

Insein Workshops, Yangoon

About Insein Workshop:

The Insein workshop was setup at the cost of US\$ 2.1 million that included machinery and plant but excluding the Civil Engineering Works, which were organized and budgeted by Myanmar Railways, Government of Myanmar.

Our Objective:

The objective was to have a quality oriented workshop for rehabilitation and repair of Traction Motors for diesel electric locomotives as a Turnkey Project involving design, procurement of machinery and plant, quality awareness, installation and commencing of the workshop.

Execution:

As part of this project, International Infrastructure Engineers (IIE) developed a total Quality Assurance Plan for the installation and commissioning of all machinery and plant in the workshop. The workshop is functioning successfully giving the targeted output as projected by Myanmar Railways.
